

Scalby School
being the best we can be

3 April 2024

Dear Resident,

Thank you for your ongoing patience whilst we continue with the construction of 'the village'. We are now nearing the end of the building work and hope to have this completed by the end of April 2024.

As part of the work undertaken, we have been working with Northern Power Grid who notified us that there was insufficient electricity to power the new portacabins. Consequently, they are working to put in a new substation on the school grounds. It is anticipated that this work will take between 8 – 10 weeks. To ensure that this work does not hinder on our current year 7 group being able to return to the Scalby School site, it has meant that Portakabin have had to install temporary generators.

The generators are a temporary measure until the new substation is completed. We are working with Environmental Health and Portakabin to ensure that we are meeting the required legal requirements and will be doing some work on the current cricket net ground to assist with noise mitigation from the generators.

We will endeavour to keep you updated with the progress.

Yours Faithfully,

Mr Chris Robertson
Headteacher
